1. Single Post Permalink

Use post title as a slug.

https://skolaku.com/blog/post/3/ => **https://skolaku.com/title-post-here**

- *Remove /blog and /post*

2. Single Post Title Tag

Use post title as a title tag.

<title>**Skolaku**</title> => <title>**Title Post Here**</title>

3. Single Post Meta Description

Use Excerpt as a Meta Description

<meta name="description" content="**A description of the page**" />

=> <meta name="description" content="**This is Excerpt**" />

4. Canonical

Use page URL of that page as canonical.

<link rel="canonical" href="**https://example.com/sample-page/**" />

5. Open Graph Markup

<meta property="og:url" content="**page URL here**" />
<meta property="og:type" content="website" />
<meta property="og:title" content="**Title Post Here**" />
<meta property="og:description" content="**This is Excerpt**" />
<meta property="og:image" content="**Image.jpg**" />

6. 404 Page

Create a 404 page. I have provided the template.

File tree:
- images
- include → bonus.php, subscribe.php, testimonial.php, trainer.php, usp.php
- 404.php
- blog.php
- blog_detail.php
- blog-category.php
- blog-search-result.php
- footer.php
- head.php
- home.php
- index.php
- navbar.php
- page-course.php
- page-general.php

404 page

404 Page Not Found

RANDOM article.

Maaf, halaman tidak ditemukan. Anda bisa masuk ke salah satu artikel di bawah ini.

10 Call to Action Best Practices to Get More Email Subscribers

Get more subscribers the easy way by tweaking just a few words in your call to action buttons.

Enterprise SEO: Lessons from 20 years in the trenches

Want to gain market share rapidly and boost profits? Learn the key elements of a winning SEO ..

Measurement in a cookieless world: Are you ready for what's next?

In this webinar, learn about the challenges and solutions to help you..

404 PAGE NOT FOUND shows **random** article from blog post.

7. **Insert header and footer + Additional CSS (check project brief)**

Logo (header & footer)

Logo

Select Logo

Favicon

Site Icon

No. WhatsApp

0

Insert header & body

Scripts in header

Scripts in body

Additional CSS

```
1  #comments {display:none}
2  .ast-related-post-content .entry-header
   .ast-related-post-title, .ast-related-
   post-content .entry-header .ast-
   related-post-title a {line-height:1.5;
   font-size:15px}
3  .ast-page-builder-template .ast-
   related-post .entry-header, .ast-
   related-post-content .entry-header,
   .ast-related-post-content .entry-meta
   {margin:0 auto;}
```

Add custom CSS within head tag on every page.

Add script before </head> tag

🟢 Chat via WhatsApp

Add script after <body> tag

https://api.whatsapp.com/send?phone=**628111900523**

8. Remove this field (follow the project brief)

Generals

Change general

< Prev   Next >

28. Meta tag and open graph on course page.

```
<!-- Meta Tag -->
<title>Skolaku</title>
<meta name="description" content="A description of the page" />
<meta name="robots" content="index, follow" />
<meta name="googlebot" content="index, follow" />
<link rel="canonical" href="https://example.com/sample-page/" />

<!-- Open Graph Markup -->
<meta property="og:url" content="http://www.nytimes.com/2015/02/19/arts/international/when-great-minds-dont-think-alike.html" />
<meta property="og:type" content="website" />
<meta property="og:title" content="When Great Minds Don't Think Alike" />
<meta property="og:description" content="How much does culture influence creative thinking?" />
<meta property="og:image" content="http://static01.nyt.com/images/2015/02/19/arts/international/19iht-btnumbers19A/19iht-btnumbers19A-facebookJumbo-v2.jpg" />
```
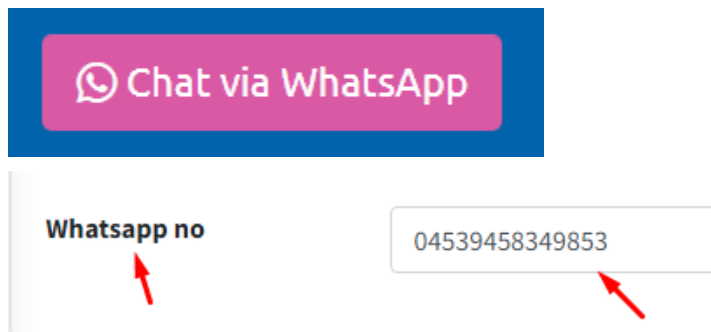

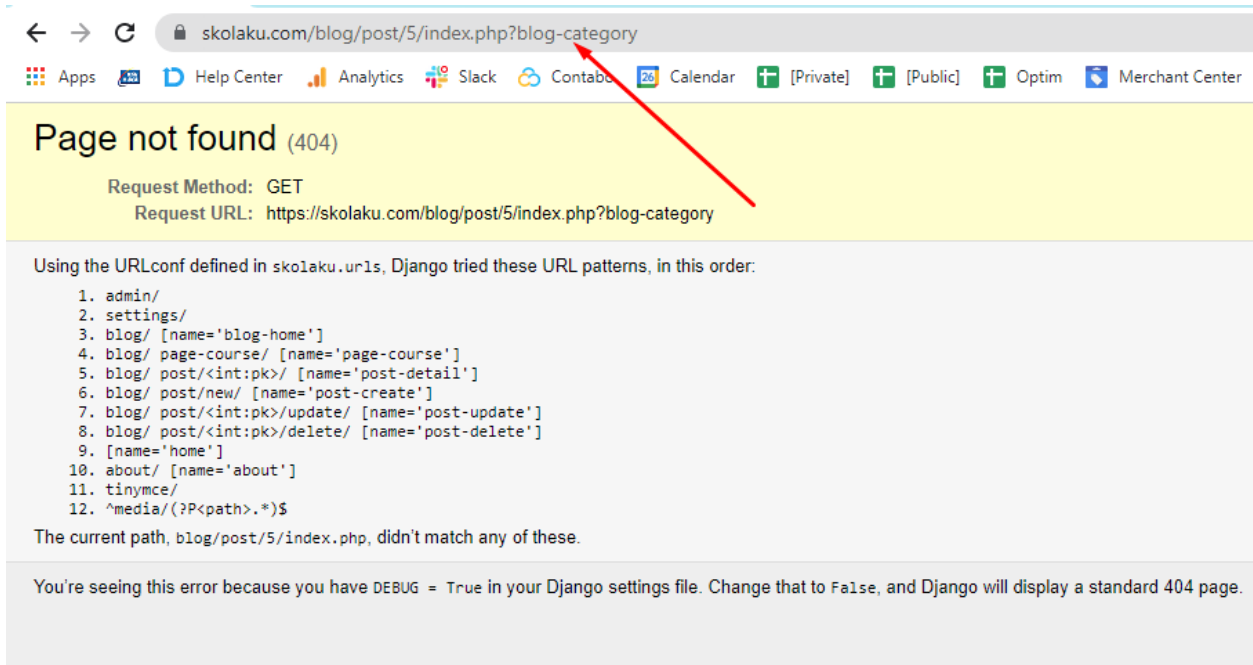

## 29. Whatsapp button on course page

Link button => **https://wa.me/04539458349853**

Whatsapp no   04539458349853

30. Blog category page is error

I have provided the template.

```
←  →  C     🔒 skolaku.com/blog/post/5/index.php?blog-category
```

Page not found (404)

Request Method: GET
Request URL: https://skolaku.com/blog/post/5/index.php?blog-category

Using the URLconf defined in skolaku.urls, Django tried these URL patterns, in this order:

1. admin/
2. settings/
3. blog/ [name='blog-home']
4. blog/ page-course/ [name='page-course']
5. blog/ post/<int:pk>/ [name='post-detail']
6. blog/ post/new/ [name='post-create']
7. blog/ post/<int:pk>/update/ [name='post-update']
8. blog/ post/<int:pk>/delete/ [name='post-delete']
9. [name='home']
10. about/ [name='about']
11. tinymce/
12. ^media/(?P<path>.*)$

The current path, blog/post/5/index.php, didn't match any of these.

You're seeing this error because you have DEBUG = True in your Django settings file. Change that to False, and Django will display a standard 404 page.

31. Select author automatically (Add new post)

Remove / hide this option. It is should be automatically select role based on login authentication.

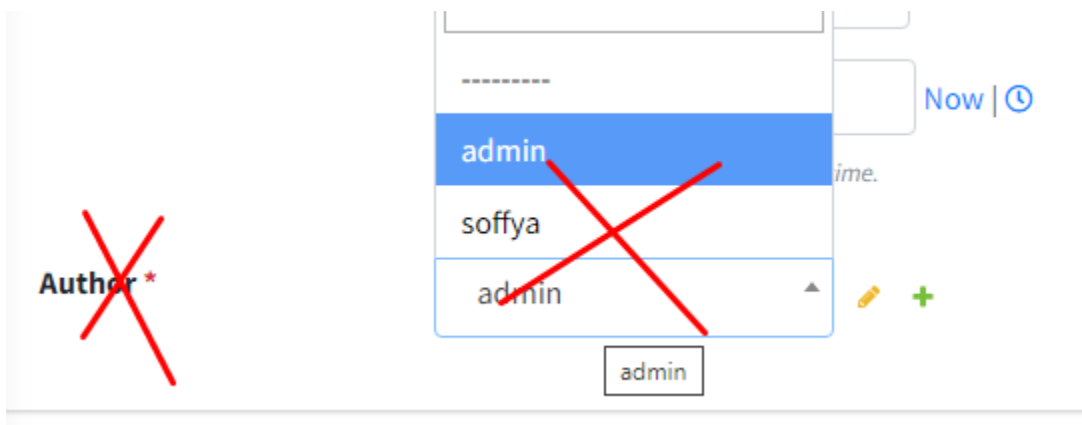

32. It should Youtube video ID only (not full URL)

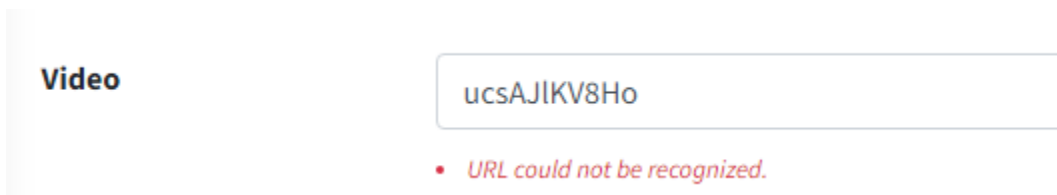

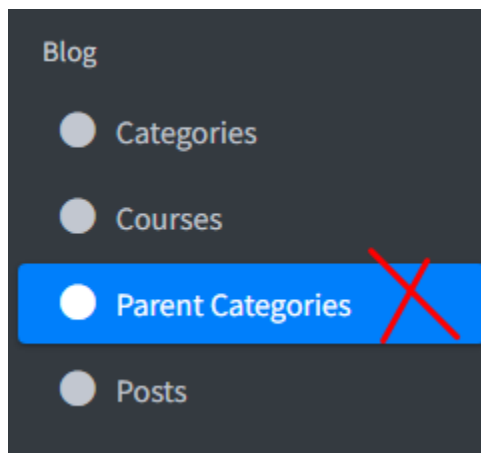

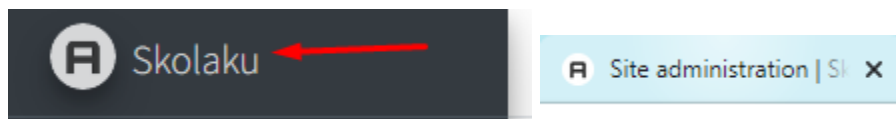

33. The embed does not work.

34. Remove parent categories

35. Use Logo skolaku.

Use this: https://skolaku.com/static/images/logo.png

36. User should be able to add image directly on post.
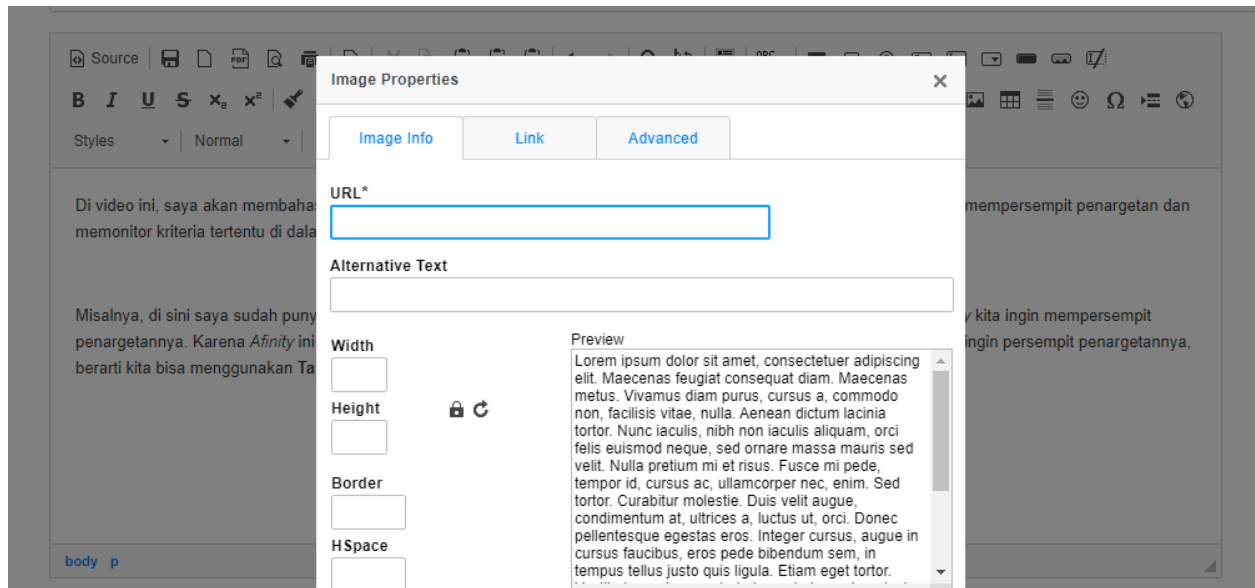

37. About.

Just show the form (not the list).

Remove some button.
